FLOOD WARNING CANCELLATION / WATERSHED CONDITIONS BULLETIN

DATE: February 13, 2009
TIME: 2:00 p.m.

Message sent on the basis of information received from:

**Kawartha Conservation Flood Forecasting Network
MNR – Surface Water Monitoring Center
Environment Canada**

Kawartha Region Conservation Authority advises that the Flood Warning issued on Thursday, February 12 is no longer in effect.

Water levels in rivers and streams throughout the Kawartha Conservation watershed peaked yesterday and are now declining. This trend will continue throughout the weekend, with no precipitation and below freezing temperatures forecast for southern Ontario.

The water levels at the locations of localized flooding in low-lying areas, areas adjacent to watercourses and road overtopping will gradually recede.

Local watercourses continue to be extremely dangerous. Kawartha Conservation is asking all residents and children to stay away from all watercourses, water structures such as bridges, culverts and dams as well as flooded locations. Elevated water levels, fast flows and slippery conditions from newly formed ice continue to make these locations extremely dangerous.

Kawartha Conservation will continue to monitor the situation on a 24-hour basis and will apprise the public and watershed municipalities of any changes. If you are concerned about or are aware of flooding, please contact Kawartha Conservation at (705) 328-2271 or (705) 344-0155 after hours.
